Fire Safety Journal **19** (1992) 313–314

CONTENTS OF VOLUME 19

Number 1

Special Issue: The 15th International Fire Safety Conference

Editorial 1

Nuclear Power Plants: A Unique Challenge to Fire Safety 3
STEVEN P. NOWLEN (USA)

Rate of Heat Release Testing for Vinyl Wire and Cable Materials with Reduced Flammability and Smoke—Full-Scale Cable Tray Tests and Small-Scale Tests . . 19
A. WILLIAM COAKER, MARCELO M. HIRSCHLER & CRAIG SHOEMAKER (USA)

Properties of PVC Compounds With Improved Fire Performance for Electrical Cables 55
ALISTER F. MATHESON, ROBIN CHARGE (UK) & TOR CORNELIUSSEN (Norway)

The Use of a Model for Hydrogen Chloride Transport and Decay to Predict Airborne Hydrogen Chloride Concentrations in a Full-Scale Room–Corridor Scenario 73
F. MERRILL GALLOWAY & MARCELO M. HIRSCHLER (USA)

Studies on Flame Retardant Intumescent Char: Part I 103
D. SCHARF, R. NALEPA, R. HEFLIN & T. WUSU (USA)

Calendar 119

Numbers 2 & 3

Introduction 123

Fire Modelling: A Mature Technology? 125
P. H. THOMAS (UK)

Optimizing Sampling Arrangements for High Sensitivity Smoke Detectors in Computer Facilities 141
R. J. COOPER, P. F. JOHNSON & G. TIMMS (Australia)

Fire Resistance of Columns in Steel Frames 159
J.-M. FRANSSEN & J.-C. DOTREPPE (Belgium)

Chemical Species Produced in Fires Near the Limit of Flammability 177
J. H. MOREHART, E. E. ZUKOSKI & T. KUBOTA (USA)

Fire Safety Journal (**19**) (1992)—© 1992 Elsevier Science Publishers Ltd, England.
Printed in Northern Ireland

Two-Zone Model for a Single-Room Fire 189
D. M. BRANI & W. Z. BLACK (USA)

Convective Heat Transfer from Fire Gases 217
G. T. ATKINSON & D. D DRYSDALE (UK)

Calendar 247

Number 4

Fire-Field Modelling on Parallel Computers 251
E. R. GALEA & C. S. IEROTHEOU (UK)

A Methodology for the Determination of Code Equivalency with Respect to the Provision of Means of Escape 267
T. J. SHIELDS, G. W. SILCOCK & K. E. DUNLOP (UK)

A Numerical Simulation of the NBS Cup Furnace Toxicity Test 279
E. N. LING, E. METCALFE, S. NADARAJAN & M. K. PATEL (UK)

Evaluation of Deterministic Fire Models: Part I—Introduction 295
ALAN BEARD (UK)

Letter to the Editor 307

News Item 309

Calendar 311
